## Highlights of the Workspace

- Fully personalized, secure web portal for **access to all assigned apps across all platforms** = Native Windows, Linux, MacOS & Web
- **Extremely fast**, own developed **streaming protocol** for smooth remote working
- **Mounted drive** that can be paired with all applications and offers offline functionality
- **Automated connection setup** to any existing server location with segmentation at application level
- Via interfaces, directly **create and manage new VMs** in the data centers of well-known Cloud providers
- Offer any app from any infrastructure source as SaaS via a **Shop System** and **Marketplace** with automated provisioning
- **Increase security** by using multi factor or third party authentication solutions

## More productive with oneclick™!

As a central access and distribution platform in the cloud, oneclick™ combines SaaS, PaaS and IaaS from any on-premises and cloud environment behind one web portal.

Only oneclick™

- comes as a service that can be scaled up and down on demand with a monthly bill,
- enables central management and delivery of all resources via a workspace in the browser,
- decouples the complete corporate network from the users while reducing the number of necessary connections,
- serves as a single authentication point, and
- needs no endpoint management anymore due to highly-encrypted streaming.
